Volume 5, Numbers 1-6, 1969

SOVIET MATERIALS SCIENCE

A translation of *Fiziko-khimicheskaya Mekhanika Materialov*

Volume 5, Number 1 January-February, 1969

CONTENTS

	Engl.	Russ.
Investigation of the Fatigue Strength of Steels 22K and 16GNM in Boiling Water under Conditions of Strongly Asymmetric Loading Cycle—I. V. Kudryavtsev, I. N. Shkanov, and A. S. Maminov	1	6
Effect of Notch Sharpness on the Endurance of Steel Specimens in Corrosive Media—R. G. Pogoretskii, M. M. Matseiko, and G. V. Karpenko	5	15
Effect of Residual Air Pressure on the Long-Time Strength of Low-Carbon Steel at Elevated Temperatures—N. P. Drozd and G. G. Maksimovich	9	16
Certain Specific Characteristics of Contactless Vacuum Thermochromizing—A. I. Plyshevskii, Yu. K. Belov, E. P. Ponomarenko, L. I. Filina, and S. Ya. Panfilova	111	21
Changes in the Endurance of Alloy D16AT after Cyclic Overloading—S. V. Nagirnyi and G. G. Maksimovich	16	25
Correlation between Exoelectron Emission of Ferrous Alloys and Their Susceptibility to Stress Corrosion—L. K. Zamiryakin, L. T. Shepelina, and E. M. Gutman	19	28
Investigation of Corrosion Fatigue of Grade A1 99.99 Aluminum in 0.5 M NaOH Solution—M. Paul and Kh. Veiland	22	32
Effect of Multicomponent Inhibitors KKh-2 and KKhK on Corrosion and Pickling Rates and Mechanical Properties of Metals—N. G. Chen and Yu. V. Fedorov	26	38
Inhibiting the Dissolution of Zinc and Magnesium Alloys in Acid Emulsions—L. N. Petrov	31	44
Mechanism of Cavitation and Its Dependence on the Corrosion Resistance of Metals—M. G. Timerbulatov	36	50
Investigation of Cast Alloys of the System Cr—Co—B Resistant to Abrasive Wear and Corrosion in Aggressive Media—A. V. Smirnov and N. A. Syroegina	39	54
Anisotropy of Corrosion Properties of Carbon, Low-Alloy, and High-Alloy Steels—L. P. Vladimirov and E. I. Kargina	42	57
Phonon Theory of Brittle Fracture of Solids—G. M. Bartenev and I. V. Razumovskaya	44	60
Theory of the Computation of Defects and Strength of Fully Oriented Polymers—S. I. Mikitishin, Yu. N. Khomitskii, and A. N. Tynnyi	50	69
Causes of Extremal Variations in the Strength of Polymer Films under the Influence of Water—S. A. Kazakevich, P. V. Kozlov, and A. P. Pisarenko	55	75
Effect of the Structural State on the Strength of Teflon in Liquid Media—N. G. Kalinin, A. N. Kogut, A. I. Soshko, and A. N. Tynnyi	59	80
Certain Characteristics of Fracture of Polypropylene under the Influence of Aggresive Media, Temperature, and Mechanical Loads—Yu. K. Volkov and A. V. Molokanov	63	85
Mechanical and Thermal Fracture of Plastics under Cyclic Strains—S. B. Ratner, V. I. Korobov, and S. G. Agamalyan	66	88
Residual Stresses in Binder-Fiber Filler Systems—V. L. Polyakov and Yu. A. Gorbatkina	70	94
Wear Resistance and Endurance of Certain Nitrided Titanium Alloys—V. I. Pokhmurskii, V. A. Kulik, and G. V. Karpenko	77	101
Investigation of Changes in Physicomechanical Properties of Metals during Elastic-Plastic Contact Deformation—B. I. Kostetskii and A. P. Potamoshnev	79	103

CONTENTS

(continued)

	Engl.	Russ.
Investigation of Wear Resistance and Antifriction Properties of Hard-Anodized Alloy V95-T under Dry-Friction Conditions—Yu. P. Dyachenko, B. V. Protopopov, L. A. Kadenatsii, and V. K. Bondarenko	80	105
Eliminating the Weakening Effect of Lead-Bismuth Eutectic on Steel by Reducing the Strain Rate—M. I. Chaevskii and A. L. Bichuya	82	107
Correlation between Limited Impact Fatigue and Mechanical Properties of St. 45 Steel Deoxidized by Various Methods—E. L. Kharish, I. P. Volchok, V. K. Yarkovoi, S. Ya. Yarema, and Yu. A. Shul'te	84	109
Effect of Mechanical Vibrations of Ultrasonic Frequency on the Structure of St. 45 Steel —N. L. Pozen, V. N. Semirog-Orlik, and I. A. Troyan	86	112
Influence of Uniform Heat Flux on the Critical Load for a Plate with a Crack—G. S. Kit	88	114
Critical Equilibrium State of an Infinite Brittle Body with an Arbitrarily Oriented Elliptical Crack—V. V. Panasyuk and A. E. Andreikiv	90	116
Resistance of Steel to the Propagation of a Crack Formed by Cyclic Loads Acting in the Region of a Stress-Raiser Tip—O. N. Romaniv, I. P. Vyval and I. R. Dyakiv	93	118
Effect of Siliciding on Certain Properties of Medium-Carbon Steel—V. I. Udovitskii, V. I. Pokhmurskii, L. Z. Tkachenko, and I. Ya. Yudin	95	121
Effect of Surface Treatment on the Stress-Corrosion Resistance of Austenitic Stainless Kh18N10T Steel—V. A. Shuvalov, Yu. V. Andreev, and V. V. Gerasimov	97	123

SOVIET MATERIALS SCIENCE

A translation of *Fiziko-khimicheskaya Mekhanika Materialov*

Volume 5, Number 2 March-April, 1969

CONTENTS

	Eng./Russ.	
Criteria for the Increase in Strength of Parts Subjected to Surface-Diffusion Treatment—V. I. Pokhmurskii and G. V. Karpenko	99	131
Increase in the Strength of Iron Due to Internal Adsorption of Surface-Active Impurity Atoms on Dislocations—V. I. Likhtman, M. A. Khrishtal, S. A. Golovin, I. A. Goncharenko, and V. M. Vlasov	103	136
Effect of Load Variability on the Fatigue Strength and Endurance of EI617 Alloy at Elevated Temperatures—V. N. Kufaev, I. I. Ishchenko, A. D. Pogrebnyak, and B. I. Sinaiskii	107	142
Effect of Stress Raisers on the Working Characteristics of Ship-Propeller Shafts—G. N. Filimonov, R. G. Pogoretskii, M. M. Matseiko, V. G. Kryzhanovskii, and G. V. Karpenko	110	146
Investigation of the Mechanism of Nucleation of Copper-Filled Cracks in Steel in Contact with Liquid Nonferrous Metals—A. E. Vainerman and A. A. Osetnik	114	151
Effect of the Smelting and Refining Methods on the Endurance of St. 20 Steel in Working Media—I. Yu. Liskevich, A. B. Kuslitskii, V. I. Tkachev, V. L. Mizetskii, and G. V. Karpenko	117	155
Effect of Loading Frequency on the Endurance of Duralumin in Air and in Corrosive Media—V. P. Tokarev	119	158
Role of the Material of Contacting Parts in the Resistance of Steel to Corrosion-Fatigue Fracture—Ya. M. Sirak	122	161
Investigation of the Interdependence of Stress Corrosion of Austenitic Chromium-Nickel Steels and Their Susceptibility to Intergranular Corrosion—V. I. Gerasimov, N. A. Reshetkina, and A. V. Ryabchenkov	125	165
Cathodic Hydrogen-Permeation Paths and Segregation Sites in Iron—A. K. Litvin and R. I. Kripyakevich	129	170
Effect of Gaseous Hydrogen on the Properties of Steel—I. I. Vasilenko, M. G. Khitarishvili, V. S. Fedchenko, and G. V. Karpenko	133	176
Investigation of the Resistance of Steel to Atmospheric Corrosion and Hydrogen Charging in Various Climatic Zones in Relation to the Quality of Protective Paint Coatings—K. V. Popov, E. P. Nechai, and T. V. Smirnova	135	179
Hydrogen Permeability of Annealed and Deformed Carbon Steels with a Lamellar Pearlite Structure—V. P. Levchenko, V. A. Gol'tsov, and P. V. Gel'd	138	182
Electrotransport of Hydrogen in 1Kh18N10T Chromium-Nickel Steel and Copper at 700-1000°C—V. M. Sidorenko, R. I. Kripyakevich, and B. F. Kachmar	142	187
Electrotransport of Hydrogen in Fe, Ni, and Cu at Temperatures of 40-80°C—V. M. Sidorenko and R. I. Kripyakevich	145	191
Hydrogen Embrittlement of Surface Layers of Steel during Friction in Contact with Copper Alloys—A. A. Polyakov and D. N. Garkunov	149	197
Effect of Previous Corrosion on the Impact Strength of Steel Specimens with Stress Raisers of the Screw-Thread Type in Relation to the Method of Thread Cutting—Z. G. Dutsyak and Yu. I. Babei	152	201

CONTENTS

(continued)

	Engl.	Russ.
Investigation of the Antifriction Properties of Materials of the Iron-Fluoride Type —I. M. Fedorchenko, Yu. F. Shevchuk, V. N. Miroshnikov, and V. D. Zozulya	156	206
Effect of Oxide Films Produced by Treatment in Water Vapor on the Friction and Surface Damage of Cast Irons—V. P. Ovcharov and N. S. Dubovik	159	210
Certain Features of Cavitation Erosion of Metals in Liquid Oxygen—Yu. E. Krot, D. N. Bol'shutkin, and V. V. Gavranek	162	214
Electron Fractographic Study of "White" [Etch-Resistant] Layers Formed in Friction —Yu. S. Veselyanskii and I. Kh. Tartakovskaya	165	218
Wear Resistance of Titanium Alloys after Thermodiffusional Chromosiliciding —D. S. Gil'gur, A. S. Berenblyum, V. V. Bezer, and L. M. Ivanchenko	168	222
Effect of Combined Cyclic Elastic-Plastic Deformation and Tempering on the Mechanical Properties of Quenched Steels—I. P. Vyval', N. N. Tkachenko, and I. Yu. Liskevich	171	225
BRIEF COMMUNICATIONS		
A Method of Estimating Endurance in Cases of Asymmetric Loading Cycles —O. N. Romaniv and I. S. Sorokivskii	174	229
Methods of Investigating Contact Temperatures and Temperature Fields during Grinding —B. Ya. Borisov, N. A. Kostenko, A. K. Tsokur, V. V. Tatarenko, G. D. Salo, V. V. Petrykin, and S. M. Pesochin	177	232
Investigation of Brittle Fracture of Materials in Static and Dynamic Bending —V. M. Grosheva, T. I. Gaiova, and A. F. Beloivan	178	234
Effect of Heat Treatment and Alloying on the Equicohesion Temperature of Nickel-Chromium Alloys—I. N. Kidin, I. V. Doronin, and V. V. Medvedev	180	235
Variation in the Electron Work Function of Metal Surfaces in the Presence of a Surface-Active Medium—N. L. Gerasyutenko and L. F. Kolesichenko	183	238
Effect of Reversible Friction on the Corrosion Resistance of Steel—V. D. Evdokimov and G. E. Movsesov	184	240
Automatic Loading System for Tensile Testing Machines—V. A. Koval and I. V. Karpenko	186	242
Reaction of Selenium and Tellurium with Iron and Carbon Steel—A. Ya. Zaslavskii, A. V. Gorokh, Ya. E. Gol'dshtein, and R. I. Shenk	187	243
Changes Produced by Boronizing and Calorizing in the Structure and in Certain Properties of St. 45 Steel—V. I. Pokhmurskii, V. S. Zamikhovskii, and V. S. Fedchenko	189	245
Corrosion Cracking of High-Quality 30CrMnSiNi Steel with Different Structures and Degrees of Impurity—I. I. Vasilenko, G. V. Karpenko, A. B. Kuslitskii, G. A. Khasin, G. D. Stefanov, and S. N. Chubatina	190	247
Effect of a Surface-Active Lubricant on the Contact Endurance of Quenched Ball-Bearing Cr15 Steel—K. B. Katsov	192	248
Multiparameter Investigation of the Fatigue of Ferromagnetic Metals—V. V. Chernyak	193	250
Effect of Surface-Active Substances Formed in Lubricating Oils on External Friction —P. V. Nazarenko and P. P. Klimenko	195	252

SOVIET MATERIALS SCIENCE

A translation of *Fiziko-khimicheskaya Mekhanika Materialov*

Volume 5, Number 3 May-June, 1969

CONTENTS

	Eng./Russ.	
Stress-Corrosion Cracking of Thermomechanically Treated Steels—O. N. Romaniv, V. A. Dudin, and G. V. Karpenko	199	259
Cracking of Plain Carbon Steel in Hydrogen Sulfide Solutions—V. P. Koval, A. I. Zyubrik, I. I. Vasilkenko, and G. V. Karpenko	203	264
Investigation of the Corrosive Influence of Hydrogen Sulfide on the Metal of Pumping-Gear Bars—G. I. Tveritinov	206	268
Crack Formation in Iron-Nickel Alloys under Stress in Alkaline Media —L. K. Zamiryakin and A. G. Aleksandrov	209	272
Investigation of the Corrosion of Alloy V-93 under Stress—T. N. Smirnova, V. M. Charikov, F. V. Kosvintseva, and F. P. Verbovoi	213	275
Investigation of the Microelectrochemical Heterogeneity of Metal Structure —G. V. Karpenko, E. M. Gutman, I. E. Samostyanik, and L. M. Gavrilenko	218	280
Corrosion-Fatigue Strength of Steel 0Cr18Ni10Ti in Aqueous NaCl and $MgCl_2$ Solutions at High Temperatures and Pressures—G. V. Karpenko, N. N. Tkachenko, V. V. Potapov, Yu. M. Zafiiovskii, B. F. Kiliushko, and I. E. Kolosov	223	287
The Effect of Cyclic Overloads on the Structure and Properties of D16AT Alloy —G. G. Maksimovich and S. V. Nagirnyi	226	291
Residual Stresses in Iron after Nitriding, Carburizing, and Boriding—V. G. Permyakov, I. Kh. Trush, A. N. Dorofeeva, and A. V. Bil'chenko	231	297
Temperature Dependence of the Strength of Aluminum and Lead at Low Temperatures —D. A. Didenko, V. V. Pustovalov, and V. S. Fomenko	234	302
Time-To-Rupture and Creep of Polymers in Radiation Fields—V. F. Stepanov, S. E. Vaisberg, and V. L. Karpov	237	306
Investigation of Time-To-Rupture of Polymethyl Methacrylate under the Combined Influence of Active Liquid Media and γ-Radiation—A. N. Tynnyi, Z. A. Bazilevich, S. I. Mikitishin, Ya. I. Lavrentovich, and G. V. Karpenko	242	314
Electron Paramagnetic Resonance and Infrared Spectroscopy Studies of the Relation between Changes in the Mechanical Properties and the Chemical Structure of Epoxy-Bonded Reinforced Plastics under the Influence of Electron Bombardment —E. A. Barbashov, V. A. Bogotov, R. I. Kozyreva, B. A. Kiselev, B. I. Panshin, B. V. Perov, and M. A. Chubarova	245	318
Three-Dimensional Viscous Flow of Fissile Materials during High-Temperature Swelling under the Influence of Inert Gases—M. S. Koval'chenko	249	323
Stresses in a Cylindrical Shell with an Arbitrarily Oriented Crack—S. Ya. Yarema and M. P. Savruk	252	328
Critical Equilibrium of a Brittle Solid Weakened by a System of Axisymmetric Surface Cracks—A. E. Andreikiv and V. V. Panasyuk	258	338
The Stressed State of a Heated Material with Internal Circular-Crack Type Defects —G. S. Kit and O. V. Poberezhnyi	262	345
Steady-State Thermoelastic State of a Heterogeneous Plane with a Slit along an Arc of the Circumference of a Round Inclusion—I. V. Gaivas	266	351

CONTENTS

(continued)

	Engl.	Russ.
Construction of Strength Diagrams for a Brittle Body with Defects of Elliptical Shape —L. L. Libatskii	270	357
Determination of Local Heat Treatment Conditions for Cylindrical Shells with Residual Stresses—E. I. Grigolyuk, Ya. I. Burak, V. Yu. Kruchkevich, and Ya. S. Podstrigach	273	361
BRIEF COMMUNICATIONS		
The Effect of Deformation Rate and Temperature on the Density of Cast Polyamides —V. F. Zabashta, M. T. Bryk, and A. I. Kuyun	278	370
Universal Etching Reagent for High-Alloy Steels under Other Alloys—A. K. Mikhailov and S. K. Yaremkevich	279	371
Device for Investigating Friction of Polymer Materials—V. A. Belyi, M. I. Petrokovets, V. G. Savkin, and A. I. Sviridenok	280	373
Long-Term Strength of Polymers under the Influence of Reactor Radiation —A. A. Velikovskii, A. N. Tynnyi, and V. S. Karasev	280	374
Stress Relaxation in Polymethyl Methacrylate in Liquid Media—A. N. Tynnyi, V. M. Gural', N. G. Kalinin, and A. I. Soshko	283	376
Universal Apparatus for Melting and Casting Lithium—G. G. Maksimovich, N. P. Drozd, M. I. Shevchuk, and V. S. Baranetskii	285	378
The Nature of Fracture of Steel Surface Layers due to Contact Fatigue in Active Working Media—K. B. Katsov and G. V. Karpenko	286	380
The Thermodynamics of Irreversible Processes during the Graphitization of Iron-Carbon Alloys—A. A. Zhukov	288	382

SOVIET MATERIALS SCIENCE

A translation of *Fiziko-khimicheskaya Mekhanika Materialov*

Volume 5, Number 4 July-August, 1969

CONTENTS

	Eng./Russ.	
Size Factor in the Fatigue of Steel Shafts with Press-Fitted Parts—G. V. Karpenko, R. G. Pogoretskii, G. N. Filimonov, and Ya. M. Sirak	291	387
The Effect of Tempering Temperature, Machining Operations, and Applied Stress on the Susceptibility of High-Quality 1Cr12Ni2WMoV Steel to Stress Corrosion—M. F. Alekseenko, V. P. Batrakov, V. Ya. Belous, I. S. Kalashnikov, V. A. Konstantinov, T. P. Kuznetsova, and L. A. Filimonova	297	393
The Mechanism of the Nucleation of Corrosion Cracks—K. N. Tseikovich and V. V. Gerasimov	302	398
Effect of Previous Loading on the Properties of 1Cr18Ni9Ti Steel at Elevated Temperatures—G. G. Maksimovich, F. P. Yanchishin, V. S. Pavlina, and E. M. Lyutyi	307	403
Removal of Residual Stresses by Low-Temperature Annealing to Prevent Stress-Corrosion Cracking of Carbon Steels—A. I. Zyubrik, N. N. Zhagalyak, I. I. Vasilenko, and G. V. Karpenko	312	409
Long-Term Strength of Low-Carbon Steel in Argon of Various Degrees of Purity—N. P. Drozd and G. G. Maksimovich	318	415
Brittle-to-Ductile Transition in the Fracture of Steels Hardened by Thermomechanical Treatment—O. N. Romaniv, Yu. V. Zima, N. L. Kuklyak, and M. A. Kutsyn	323	420
Variation in the Physical Properties during Fatigue and Variation in the Fatigue Strength of Boronized St. 20 Steel—L. S. Lyakhovich, B. V. Babushkin, and A. Ya. Kulik	328	426
Effect of Specimen Geometry on Impact Strength and Ductile-to-Brittle Transition Temperature—A. P. Gulyaev and V. A. Dogadaeva	332	429
Effect of Molten Gallium on the Surface Tension of Solid Cadmium—V. I. Likhtman, I. A. Andreeva, L. S. Bryukhanova, and E. D. Shchukin	336	433
Changes in the Structure of 1Cr18Ni9Ti Steel Held under Load at Elevated Temperatures (650°C) in Liquid Medium—F. P. Yanchishin, G. G. Maksimovich, and B. N. Borshch	340	438
The Effect of Lithium on the Mechanical Characteristics of Austenitic Stainless Steels—V. V. Popovich, M. S. Goikhman, E. I. Polyakov, and M. I. Chaevskii	345	444
Effect of Oxide Films on the Corrosion-Fatigue Strength of 1Cr18Ni9Ti Steel in Liquid Pb—Bi Eutectic—A. L. Bichuya	352	451
An Investigation of Structural Transformation during the Solidification of Copper-Gallium Alloys—O. I. Tikhomirova, M. V. Pikunov, I. D. Marchukova, I. N. Tochenova, and I. P. Izotova	355	455
An Investigation of the Kinetics of the Dissolution of Metals in Liquid Metals by a Rotating-Disc Method (Coefficient of Diffusion of Iron in Liquid Aluminum)—V. N. Eremenko and Ya. V. Natanzon	359	459
Problems in the Physicochemical Mechanics of Glass—G. M. Bartenev	363	463
Mechanism of Polymethylmethacrylate Cracking in Various Working Media—N. D. Shcherba, S. I. Mikitishin, A. N. Tynnyi, and G. M. Bartenev	371	473

CONTENTS

(continued)

	Engl.	Russ.
Long-Term Strength of Polymethylmethacrylate under the Influence of Liquid Media and Elevated Temperatures—A. N. Tynnyi, N. A. Ol'khovich-Novosadyuk, A. I. Soshko, N. G. Kalinin, and O. A. Mikityuk	377	480
Some Specific Characteristics of the Influence of Aggressive Media, Temperature, and Stress on the Long-Term Strength of Polypropylene—Yu. K. Volkov, A. V. Molokanov, and S. A. Fedorov	381	485
Time Dependence of the Strength of Certain Foamed Plastics—V. Sh. Chenborisov and N. Z. Sungatullin	383	488
The Effect of Stressed State on the Nature of Fracture of Transparent Polymers By Laser Beams—G. V. Plyatsko, Ya. S. Podstrigach, and V. M. Zhirovetskii	387	493
The Effect of Industrial Corrosion Inhibitors on Changes in the Ductility of Low-Carbon Steel during Acid Pickling—A. S. Afanas'ev, E. N. Chankova, A. N. Burmistrova, and V. M. Lunichenko	391	497
Investigation of the Effect of Certain Corrosion Inhibitors on the Effectiveness of the Model of a Specific Corrosion Cell—N. I. Narushevich, S. A. Balezin, and V. V. Romanov	392	498
The Effect of Surface Condition and Titanium Coatings on the Mechanical Properties of Molybdenum in the Temperature Interval of the Brittle-Ductile Transition —V. M. Amonenko, V. M. Azhazha, G. P. Kovtun, and M. L. Litvinenko	394	499
The Effect of Sulfur on the Fracture of CrNiMoS Steel at Low Temperatures —Yu. A. Shul'te, V. V. Lunev, A. P. Grechanyi, and A. A. Shalomeev	397	501
Limited Impact Endurance of 30CrMnSiNiN Steel—E. L. Kharish, S. Ya. Yarema, G. D. Stefanov, A. B. Kuslitskii, G. A. Khasin, and S. N. Chuvatina	399	503
The Effect of Working Media on the Fatigue Strength of Steel under High-Frequency Loads—N. L. Pozen	402	506
Wear of Steel Due to Intense Seizing—V. N. Kashcheev	404	508
Microelectrochemical Heterogeneity of Ferric-Pearlitic Structures—É. M. Gutman, I. E. Zamostyanik, and G. V. Karpenko	406	509
Stresses in a Plate with a Longitudinal Crack—M. P. Savruk	408	510

SOVIET MATERIALS SCIENCE

Translation published December, 1972

Volume 5, Number 5 September-October, 1969

CONTENTS

	Eng./Russ.	
From the Editors	411	515
An Investigation into the Stability of the Mechanical Properties of 1Cr18Ni9Ti Steel Previously Loaded at Elevated Temperatures—G. G. Maksimovich	413	517
Some Ways of Increasing the Stability of Steels Used in a Petroleum Processing Plant—I. N. Grekov, K. I. Vereshchagin, Yu. I. Rubenchik, and G. V. Karpenko	419	524
The Effect of Corrosion Damage and Aggressive Media on the Endurance of Aluminum Sheet—A. V. Karlashov and N. F. Voronkin	423	529
Specific Features of Ductile Fracture of High-Strength Steels in Torsion—O. N. Romaniv and Yu. V. Zima	427	533
Crack Nucleation and Growth Periods in 30CrMnSiNiA Steel under Repeated-Impact Tensile Loads—S. Ya. Yarema and E. L. Kharish	432	539
The Relationship between the Stressed State of Metastable Steels and Phase Transformations—S. D. Volkov, A. A. Vainshtein, and B. A. Potekhin	435	542
Causes of Reduced Fatigue Strength of Steel Specimens Previously Strained in Tension—G. T. Nazarenko and I. I. Ishchenko	440	548
Properties of Lubricating Oil Boundary Layers and Their Effect on Wear—G. I. Fuks	444	552
Investigation of the State of Metal Surfaces under Boundary-Lubrication Conditions in the Presence of Additives—B. I. Kostetskii and M. É. Natanson	451	559
Effect of Electric Fields on the Wear of Metals in Mineral Oils with Additives—G. I. Shor and E. V. Evstigneev	457	565
Investigation of the Wear Resistance of Metastable Austenitic Steels under Dry Sliding-Friction Conditions—L. G. Korshunov and R. I. Mints	461	569
Friction and Wear of Certain Metals in Contact with Liquid Nitrogen—I. G. Nosovskii and A. A. Zaporozhets	465	573
The State of the Surface Layers of Quench-Hardened Steel after Diamond Grinding—A. A. Sagarda, G. I. Val'chuk, V. G. Delevi, and L. L. Mishnaevskii	468	577
Contact Endurance of Electroslag-Refined Steels—A. I. Vil'chek, P. A. Mikhailov, and É. I. Tsivirko	472	581
Hydroerosion of Steel in Alkaline Media—A. I. Nekoz, G. A. Preis, and N. A. Sologuv	475	584
Hydrogen Permeability of Annealed and Deformed Carbon Steels with a Granular Cementite Structure—V. A. Gol'tsov, V. P. Levchenko, and P. V. Gel'd	479	588
Determination of the Coefficient of Diffusion of Hydrogen in Steel—Yu. P. Balakin, V. N. Kudryavtsev, D. V. Fedoseev, and A. T. Vagramyan	483	592
Effect of Ordering on the Rate of Diffusion and Permeation of Hydrogen in a Ni_3Fe Alloy—V. A. Gol'tsov, V. B. Vykhodets, P. V. Gel'd, and Yu. P. Simakov	488	597
Effect of Hydrogen Charging on the Thermal Expansion of an Alloy of Zirconium with 2.5% Niobium—B. S. Rodchenkov, I. S. Lupakov, Yu. S. Kuz'michev, and V. N. Vukolova	493	602
Effect of Galvanic Coatings on the Elastic Properties and the Relaxation Stability of Thin-Spring Steel Sheet—R. I. Mishkevich, S. Ya. Grilikhes, and N. G. Gavrilyuk	497	607

CONTENTS

(continued)

	Engl./Russ.	
BRIEF COMMUNICATIONS		
Effect of Stress on the Hydrogen Permeability of Heat-Resistant Materials—Yu. I. Archakov, I. D. Grebeshkova, and Yu. I. Zvezdin	502	613
Hydrogen Permeability of Iron and Steel in Tension—B. F. Kachmar, V. I. Tkachev, R. I. Kripyakevich, and B. N. Romaniv	505	615
Effect of Titanium on Certain Physicomechanical Characteristics of Mn13L Steel—S. S. Chernyak, E. A. Marmontov, M. M. Nyurenberg, Yu. D. Novomeiskii, I. P. Volchok, M. I. Kurbatov, Yu. A. Shul'te, V. N. Kashcheev, and K. V. Savitskii	507	617
Effect on Electroslag Refining on the Endurance of 15Cr16Ni2Mo Steel—T. N. Kalichak, V. I. Pokhmurskii, V. V. Smirnov, and M. F. Alekseenko	510	619
Optimum Conditions of Local Heat Treatment for Cylindrical Shells of a Finite Length with Their End Sections Secured by Various Methods—L. P. Besedina and Ya. I. Burak	512	621
Effect of Heat Treatment on the Susceptibility of High-Strength Steels to Stress-Corrosion Cracking—R. K. Melekhov, M. G. Khitarishvili, I. I. Vasilenko, and G. V. Karpenko	515	624
Investigation of the Friction Coefficient of Certain Grades of Graphite—L. M. Gul'ko, B. V. Protopopov, and B. I. Kostetskii	517	626
Estimating the High-Temperature Creep of Polycrystalline Tungsten by Long-Term Hot Hardness Measurements—Yu. N. Golovanov, A. A. Tsvetaev, O. A. Balakhovskii, and R. K. Chuzko	520	628
Certain Specific Features of the Fracture of Metals in Stress-Concentration Regions under the Influence of Aggressive Media—M. I. Chaevskii	523	631
Method of Determining Stresses in Plates with Cracks—Ya. S. Podstrigach and V. A. Osadchuk	526	633
Determination of Stresses in Metal Microvolumes by Electrode Potential Measurements—G. V. Karpenko, I. E. Zamostyanik, Yu. I. Babei, and V. I. Pokmurskii	529	635
Corrosion-Fatigue Strength of St. 3 Steel with Vacuum-Diffused Chromium Coatings—D. M. Petergerya, E. P. Ponomarenko, A. A. Domio, and V. G. Rastorgueva	531	637
Effect of Working Media and Temperature on Residual Stresses in Glass-Reinforced Plastics—S. M. Perlin, L. A. Borisenko, L. N. Obishchenko, and A. T. Lomakin	533	638
Ivan Mikhailovich Fedorchenko (on His 60-th Birthday)	535	640

SOVIET MATERIALS SCIENCE

A translation of *Fiziko-khimicheskaya Mekhanika Materialov*

Translation published December, 1972

Volume 5, Number 6 November-December, 1969

CONTENTS

	Eng./Russ.	
Formation of Dislocations in Metals during the Diffusion of Low-Solubility Surface-Active Substances—M. A. Krishtal	537	643
Structural Changes Associated with Fretting Corrosion—A. Ya. Alyab'ev, V. V. Shevelya, and M. N. Rozhkov	542	650
Effect of Ultrasonic Treatment on the Physicomechanical Properties of Certain Precision Alloys—Yu. I. Babei, S. K. Yaremkevich, N. G. Shul'ga, and I. P. Vygovskii	548	656
Effect of Small Alloying Additions on the Structure and Strength of Medium-Carbon Borided Steel—V. G. Protsik, V. S. Zamikhovskii, and V. I. Pokhmurskii	553	661
Effect of Gaseous Media on the Structure and Thermal EMF of Components of Chromel-Coper Thermocouples—N. M. Klym, A. I. Kits, N. P. Drozd, V. I. Lakh, and V. A. Salamakha	557	666
Surface Free Energy of Polymers—G. M. Bartenev and L. A. Akopyan	560	670
Effect of Strain Rate on the Strength of Polymer Materials in Liquid Media —A. N. Tynnyi, Yu. A. Kolevatov, A. I. Soshko, and N. G. Kalinin	566	676
Investigations of New Materials Based on Silver and Synthetic Micas —V. F. Afanas'ev, M. A. Parkhomenko N. I. Semenyuk, V. B. Vishnevskii, M. K. Kovpak and L. V. Zabolotnyi	569	680
Stabilizing the Supermolecular Structure and Mechanical Properties of Poly-Formaldehyde by Filler Additions—V. P. Solomko and V. P. Gordienko.	572	683
Investigation of the Adhesion of Polyurethanes at Low Separation Rates — Yu. S. Lipatov, A. N. Kuksin, and L. M. Sergeeva	576	688
Role of Stresses in Accelerating the Penetration of Liquid into Solid Metals — M. I. Chaevskii, I. M. Toropovskaya, V. V. Popovich, and A. M. Datsishin	580	692
Interaction of Liquid Gallium with Copper — O. I. Tikhomirova, M. V. Pikunov, L. P. Ruzinov, and I. D. Marchukova	586	699
Corrosion Resistance of Molybdenum Coatings Obtained by a Contact Melting Method—A. L. Bichuya, Yu. A. Garasim, A. A. Uel'skii, and M. I. Chaevskii	591	704
Effect of Diffusional Flux on Critical Equilibrium of Brittle Solids Weakened by Sharp-Edged Holes — I. V. Gaivas.	595	709
Stress Distribution Near a Crack Tip in an Anisotropic Plate—S. Ya. Yarema and G. S. Krestin	600	714
Residual Stresses in Cylindrical Shells Due to Thermal Diffusion—Ya. S. Podstrigach and V. A. Osadchuk	605	720
Investigation of Electromechanical Effects in a System of Electrically Conducting Solids in Contact with Each Other—Ya. I. Burak and B. P. Galapats	610	725
Effect of Previous Ultrasonic Treatment on the Strength of Copper in Contact with Mercury—N. K. Martynova, G. V. Mal'tsev and P. D. Novokreshchenov	616	732

CONTENTS

(continued)

	Engl.	Russ.
Effect of Annealing Conditions on the Mechanical Properties of Pure and Molybdenum-Coated Niobium—V. M. Amonenko, V. M. Azhazha, and G. P. Kovtun	618	733
Stability of the Iron-Hydrogen System—I. S. Slabkovskii, A. K. Litvin and V. A. Teterskii	621	735
Distribution of Lattice Distortions in Ferrite Grains—G. K. L'vov	624	737
Mechanical Properties of High-Quality 30CrMnSi Steel and 1Cr18Ni9Ti Steel at High Loading Rates—Yu. I. Ustinovshchikov	626	739
Effect of Friction on the Fatigue Strength of Steel—M. V. Lizanets, V. I. Pokhmurskii, and G. V. Karpenko	629	741
Effect of the Smelting Method on the Corrosion-Fatigue Strength of Low-Carbon Steel at Room and Elevated Temperatures—I. Yu. Liskevich, N. N. Tkachenko, Yu. I. Babei and G. V. Karpenko	631	743
Corrosion-Fatigue of Titanium Alloys in the Low Endurance Range—L. A. Glikman and E. D. Shekhovtse	633	744
Critical Equilibrium of a Half-Plane with a Surface Crack—A. D. Datsishin	635	746
Quasi-Brittle Fracture of a Plate with Two Semiinfinite Cuts—P. M. Vitvitskii	638	749
Fracture of Stressed Polyvinylchloride under the Influence of Solvents—M. T. Bryk	641	751
Some Specific Characteristics of the Fracture of Stressed Polymers in Aggressive Media—Yu. K. Volkov	643	753
Endurance of Elastic Plastics Loaded at a Constant Rate—Yu. I. Brokhin and S. B. Ratner	645	754
Investigation of the Influence of Aqueous Media and Surface-Active Substances on the Contact Endurance of High-Quality 20CrNi3 Chisel Steel—K. B. Katsov, A. B. Kuslitskii, G. V. Karpenko, E. P. Sentsova, and M. Zh. Dyusushe	648	757
Omnidirectional Tension Applied to a Circular Disk with an External Radial Crack—L. L. Libatskii	650	758
